

COMMERCIAL & RETAIL SECTOR

Efficient Energy for Commercial Spaces and Large Retailers

Power factor correction, solar self-consumption, battery storage, and ESG compliance for businesses leading the energy transition.

SOLUTIONS FOR THE COMMERCIAL SECTOR

Each component adapts to your business size and needs.

■ Power Factor Correction

E3A rectifiers eliminating reactive power penalties and improving supply quality. Power factor >0.95 guaranteed.

■ Battery Storage

Peak shaving, price arbitrage, and blackout backup. Protection for cold rooms, servers, and critical systems.

■ Solar Self-Consumption

Solar canopies on parking lots and rooftop panels generating 20-40% of consumption. Green image for customers and employees.

■ AM-X Electrical Protection

Leak detection and proactive protection for high-risk installations: kitchens, cold rooms, EV chargers, and machinery.

ESG TARGET COMPLIANCE

Eneraq solutions directly contribute to your sustainability indicators.

■ Environmental

Verifiable CO2 emissions reduction, renewable energy consumption, and circular economy with recyclable LiFePO4 batteries.

■ Governance

Automated energy consumption reporting, regulatory compliance, and full traceability through the platform.

■ Social

Energy communities with neighbors, local job creation, and improved comfort and safety in facilities.

SEGMENTS SERVED

■ Supermarkets and hypermarkets

■ Restaurant chains

■ Corporate offices

■ Specialty retail

■ Shopping centers

■ Hotels and hospitality

■ Logistics and warehouses

■ Service stations

REDUCE COSTS, IMPROVE YOUR ESG PROFILE
